

# Bituminous waterproofing membrane production Line

- EUROLINE manufactures various types of production line for bituminous waterproofing membrane:
- line for the production of APP-SBS-S.A. modified bitumen membranes carrier or carrier less;
  - line for bituminous-asphalt roof underlayment

The EUROLINE production line is the top of the technology with a high level of automation and a lot of other advantages:

- High efficiency
- High speed
- Excellent quality for the waterproofing membranes
- Reduced maintenance
- Low consumption energy (only 90 kW of installed power)
- Higher flexibility
- High safety (reduced noise, etc) standard
- Reduction of CO<sub>2</sub> emission
